

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

TRADE STATISTICS
OF THE
CHINESE TREATY PORTS,
SPECIALLY COMPILED FOR THE AUSTRO-HUNGARIAN EXHIBITION.

TO ILLUSTRATE THE INTERNATIONAL EXCHANGE OF PRODUCTS.

1873.

1.—In August 1872, the Austro-Hungarian Minister in China,—then Chevalier, now Baron, CALICE,—asked for assistance in arrangements to prevent China from remaining unrepresented at the Universal Exhibition, to be opened in Vienna in May 1873. In connection with the Seventh Paragraph of the Programme :—

- “ VII. To show the international exchange of products, a representation of the commerce and trade of the world
“ will be formed. For this purpose samples and specimens of the articles of trade and commerce of all
“ the important harbours and sea-ports are to be exhibited.
“ On each sample will be marked its origin, its destination, its price and value, the quantity of
“ import and export, etc.; along with these will be shown statistical and graphic tables, the movement of
“ the navigation and commerce of each sea-port during the last ten years.”

it was suggested that the Chinese Maritime Customs might do something by way of illustrating the
“ international exchange of products.”

Allowing for a two months' voyage from China to Europe, and for the time necessary for communications to pass between the Inspectorate at Peking and the Custom Houses at the ports, there only remained four or five working months before the opening of the Exhibition, and it was accordingly from the first

impossible to attempt the formation of such a collection as longer notice would have allowed of; still, the matter was at once taken in hand, and the Commissioners of Customs at the Treaty Ports of China :

Northern Ports	{	Newchwang
		Tientsin
		Chefoo
Yangtsze Ports	{	Hankow
		Kiukiang
		Chinkiang
Southern Ports	{	Shanghai
		Ningpo
		Foochow
		Tamsui
		Takow
		Amoy
		Swatow
		Canton

were instructed to prepare collections, to consist of samples of merchandise :—

- 1°. Received from Foreign Countries, *A.*
- 2°. Sent to Foreign Countries, *B.*
- 3°. Sent to Chinese Treaty Ports, *C.*

and to procure specimens of miscellaneous articles peculiar to their several localities, and any other objects of interest, which

- 4°. Were, in the time and with the means at hand, procurable by the Commissioners,..... *D.*
- 5°. Or could be obtained from Chinese who might be induced to send them for sale, *E.*
- 6°. Or could be borrowed from collectors in China and made use of while *en route* to other destinations in Europe, *F.*

The Commissioners of Customs were further instructed to prepare from the Trade Returns already in their possession certain special and uniform Tables, giving the statistics of

Tonnage,

Values,

Articles,

Revenue, and

Population,

at the Treaty Ports, according to forms suggested by the language of the official Programme.

In November 1872, one of the Commissioners of Customs, Mr. BOWRA, was detailed to inspect the collections at the Treaty Ports, and despatch them from China, and Mr. DETRING, another Commissioner then in Europe, was appointed to take charge of the collections on arrival and make arrangements for their reception at Vienna; subsequently, the Imperial Maritime Customs' Commission to visit the Vienna Exhibition, finally arrange the collection, and attend to the various matters therewith connected, was composed, comprising the following Commissioners of Customs :

Mr. HANNEN,

Mr. DE CHAMPS,

Mr. DREW,

Mr. DETRING,

Mr. BOWRA, and

Mr. CARTWRIGHT.

2.—The Chinese Collection, under the letters *D. E.* and *F.* contains some attractive and interesting articles, but it is under the letters *A. B.* and *C.* that what is really valuable is to be found. Whoever desires to study the "international exchange of products" will do well to cast an eye on that homely but complete array of samples and specimens, for, supplemented by Catalogue and Special Statistics, it will be found to explain the mutual wants which Foreign Countries and China in turn feel and in turn supply, and also to indicate, to some extent, the nature of the traffic kept up between certain important points in the Empire itself. That the Collection is but a small contribution to be sent from China, is apparent; but it is to be remembered that only one experiment has been attempted, namely, to assist in the illustration of "the international exchange of products."

3.—The Statistics that have been specially compiled to accompany and supplement the Collection, are for the period 1863–1872: they consist of

- 1°. Statistics of each Port treated independently, and which have been issued separately, and
- 2°. General Statistics compiled from the separate Port Statistics, and which follow in this cover.

Reliable as are the figures of each separate Table, these Trade Statistics, as a whole, require to be introduced with certain qualifications:

- 1°. The Statistics do not refer to all the ports of China, but only to the fourteen, called Treaty Ports—ports permitted by treaty to trade with Foreign Countries.
- 2°. The Statistics do not embrace even the whole trade of the Treaty Ports, but only such part of it as is carried on in Foreign Bottoms.
- 3°. The Statistics do not give complete Tables for every Treaty Port for the ten years in question, for, while some Custom Houses were not opened till 1864, it has only been during the last five years, since 1867, that uniform and correct methods have been matured to bring goods to account in their proper places.
- 4°. The Statistics are not to be compared with or criticised from the hitherto annually published Returns of Trade. It is not that the Special Statistics are incorrect or contradictory in their figures, but that the general objects of their compilation, and the attempt to exhibit certain conditions that exist, and to enable comparisons, otherwise impossible, to be made, rendered it necessary to present tables of *gross totals*: whereas the principle of the Annual Returns of Trade has hitherto been to eliminate the multiplied effects of many operations and show articles in the nett.
- 5°. The Statistics are defective, lastly, even as Statistics of Foreign Trade with China, inasmuch as it is impossible to procure any return of the trade in goods which enter and leave China through the British Colony of Hongkong and the Portuguese Settlement at Macao.

But, with these imperfections allowed for, and the object for which the compilation is made kept in mind, it may be said that the Special Statistics are, as statistics, neither uninteresting, uninforming nor valueless; if they do not give complete information in its most scientific form, they yet supply certain general and suggestive data in a form not to be got elsewhere, and in that way throw their contribution of light on "the international exchange of products". For fuller and more scientific statistics of China's Foreign Trade, the Annual Trade Returns, published yearly by the Department at Shanghai, must be consulted.

4.—As regards purely Chinese traffic throughout the Empire—the many things its hundreds of millions of people demand and supply, and its hundreds of thousands of Junks carry to and fro—we know, statistically speaking, nothing; but of its growing Foreign trade we have samples and statistics that yearly become, the first, more numerous and, the second, more reliable, and, thus, the Chinese Maritime Customs has been able to respond to Baron CALICE's invitation and to provide for the Austro-Hungarian Exhibition

something in the way of samples to illustrate the nature, and something in the shape of statistics to illustrate the extent, of one phase of "the international exchange of products."

These explanatory remarks are not designed to apologise for any scantiness in the Chinese Section, but explain to those who gaze on the many wonderful and interesting objects which the aims and enterprise of the Austro-Hungarian Government—

"to represent the present state of modern civilization and the entire sphere of national economy, and to
"promote its further development and progress,"

have brought together for the enlightenment of the age, how it is that there is a Chinese Collection, what that Collection is, and why it is that it and its Statistics possess some special claims to attention.

ROBERT HART,

Inspector General of Chinese Maritime Customs.

PEKING,

25th July, 1873.

VIENNA

V.
POPULATION.

POPULATION STATISTICS of
the Chinese Ports frequented
by foreigners, and the Provinces
in which they are situated.

1. Treaty Port Provinces :—Cities, Population, Physical features.
 2. Treaty Ports :—Native Population, Foreign Residents [Firms, Individuals].
-

1.—TONNAGE.

The Tables which follow, $\frac{1 @ 5}{\text{Tonnage}}$, are intended :—

- 1°. To give the annual total of Entries and Clearances and the Gross Tonnage of Foreign Vessels of all classes arrived at or departed from all the Treaty Ports of China.
 - 2°. To show to what extent the Home [*i.e.* Chinese Coasting Trade] and Foreign [*i.e.* Direct Trade with Foreign Countries] Trade of China have, severally, annually given employment to Foreign Tonnage.
 - 3°. To illustrate the growth of Steam Traffic, by showing the extent to which Steamers and Sailing Vessels have severally contributed to Entries, Clearances and Tonnage annually.
 - 4°. To compare the shares of different Foreign Flags in the employment given to Foreign Tonnage by the China Trade.
 - 5°. To show to what extent each Treaty Port of China has given employment to Foreign Tonnage annually.

NOTE.—The Tables which precede, $\frac{1 @ 5}{\text{Tonnage}}$ deal with gross totals, and not with individual vessels :

that is to say, when the number of entries is given as being 9,432, what is meant is, that, including the entries of vessels re-appearing for the second, tenth or, it may be, twentieth time during the same year, as well as those of original arrivals, the total number of Entries has been so many, and the Gross Tonnage of all those entries so much. Not only do many of the vessels which contribute to the Entries, Clearances and Tonnage of one Port, proceed to other Ports and contribute to their statistics, but there are likewise many of them which re-appear at the original port of entry, re-entering and re-clearing several times during the year, but with fresh cargoes each time.

II.—VALUES.

The Tables which follow $\frac{1 @ 4}{\text{Values}}$ are compiled from the separate Tables of the several Ports. The separate

Tables were intended to show :—

- 1°. The Gross Value of Merchandise arriving at and departing from each Port annually.
- 2°. The division of the Gross Values between the Home Trade and Foreign Trade of each Port.
- 3°. The division of the Gross Values between the Foreign Flags freighted.

From these three are now compiled four General Tables :—

- 1°. To give the Gross Value of all the trade carried on in Foreign Bottoms at all the Treaty Ports.
 - 2°. To give the Gross Values of the Home Trade and Foreign Trade of all the Treaty Ports as carried on in Foreign Bottoms.
 - 3°. To give the Gross Values of the cargoes carried under each Foreign Flag.
 - 4°. To place the Gross Values of the trade of the several Treaty Ports side by side in one Table.
-

I Values. **GROSS TOTAL of the Values of the Commodities that arrived at or left all Treaty Ports.**

NOTE.—The Tables which precede $\frac{1 @ 4}{\text{Values}}$, make no deductions on account of either Re-imports or Re-exports, but are Tables of *gross values*. They must be regarded, so to speak, from the dynamic and not from the static side of Trade, for they exhibit the accumulating value of commodities in motion, and not their net value as simultaneously existing. Looked at in connection with the Tables of Tonnage already given, the Tables of Value afford data for comparing, in a general way, the Home Trade with the Foreign Trade of China, the trade of any one port with that of each other port, and, more accurately than either, the relative values of the commodities that freight the vessels of different nationalities.

III.—ARTICLES.

Foreign Merchandise and Chinese Produce.

The Tables which follow, $\frac{1 @ 9 \text{ and } A @ C}{\text{Articles}}$, are intended:—

- 1°. To give the quantities of the chief, and the values of all commodities imported direct from Foreign Countries by the Treaty Ports of China,—that is to say, to exhibit the *Foreign Import Trade* of China.
- 2°. To show to what extent Foreign Imports proved unsaleable in China, or were sent for better prices elsewhere,—that is to say, to give the statistics of *Foreign Re-exports*.
- 3°. To show from the returns of the ports engaged in direct trade with Foreign Countries how Foreign Imports are sent thence to the other Treaty Ports that have no direct Foreign Trade,—that is to say, to give some of the statistics of *Distribution*.
- 4°. To show from the returns of the ports not engaged in direct Foreign trade what has been the quantity and what the value of the Foreign Imports received by them from the ports that have a direct trade,—that is to say, to give additional Distribution statistics for a comparison between the value of commodities when sent from the original ports of importation and when received by the ports thence fed.
- 5°. To show the *Home Export Trade* of China as carried on in Foreign Bottoms between Treaty Ports,—that is to say, to give the quantities of the principal, and the value of all commodities of native origin, and being original shipments, which Foreign Bottoms carry from Treaty Ports to Treaty Ports according to the returns of the ports of shipment.
- 6°. To show the *Home Import Trade* of the Chinese Treaty Ports as carried on in Foreign Bottoms,—that is to say, to give the quantities of the principal, and the value of all commodities of native origin arrived from Treaty Ports in Foreign Bottoms, according to the returns of the ports of discharge.
- 7°. To give the statistics of *Home Re-shipments* and show to what extent Treaty Ports have served as forwarding stations for other Treaty Ports,—that is to say, to give the quantities and values of the Chinese commodities which, after arrival at a Treaty Port in Foreign Bottoms, have been re-shipped in Foreign Bottoms to other Treaty Ports.
- 8°. To give the statistics of *Home Re-shipments for Foreign Export* and show the extent to which Chinese Home Imports become Chinese Foreign Exports,—that is to say, to give the quantities and values of the Chinese commodities which are brought from Treaty Ports to Treaty Ports in Foreign Bottoms and subsequently re-shipped in Foreign Bottoms to Foreign Countries.
- 9°. To give the quantities of the chief, and the value of all Chinese commodities sent direct to Foreign Countries from Chinese Treaty Ports,—that is to say, to give the *Direct shipments of the Foreign Export Trade* of China.

And,—

- A°. To give the statistics of the *Tea Export Trade*, and the share taken by each Foreign Country in it,—that is to say, to give the total quantities of Tea—both original shipments and re-shipments of Tea previously received at one from other Treaty Ports—which have been shipped annually in Foreign Bottoms to each Foreign Country from Chinese Treaty Ports.
- B°. To give the statistics of the *Silk Export Trade*, and the share taken by each Foreign Country in it,—that is to say, to give the total quantities of Silk—both original shipments and re-shipments of Silk previously received at one from other Treaty Ports—which have been shipped annually in Foreign Bottoms to each Foreign Country from Chinese Treaty Ports.
- C°. To give the statistics of the *Opium Net Import Trade* as divided between the Treaty Ports,—that is to say, to show the quantities of Opium imported at each Treaty Port *less* re-exports, or in other words to show the quantity consumed in each district drawing its supplies from any one Treaty Port. For 1872 the Net Total Import has been divided into sorts, in order to show the proportion, owing to difference of taste resulting from climatic and other agencies, taken at each port of the several kinds of drug.

I **IMPORT TRADE : Quantities and Values of Foreign Merchandise arrived direct from Foreign Countries in Foreign Bottoms at Treaty Ports.**

Almost all the Opium imported into China reaches it through Hongkong. As the quantity consumed there is comparatively trifling, the amount brought into China in Native vessels, and which consequently does not appear in these Returns, must be nearly equal to the quantity by which the Hongkong importation exceeds the entries at the Treaty Ports.

The total importation into Hongkong, its excess over the entries at the Treaty Ports, and the estimated value of each, are shown in the following Table.

YEARS.	HONGKONG.		TREATY PORTS.		OPIUM TAKEN FROM HONGKONG IN CHINESE BOTTOMS OR TO NON-TREATY PORTS.	
	Total Import.	Value.	Total.	Value.	Quantity.	Value.
1865,.....	<i>Peculs.</i> 76,523	<i>Hk. Ta</i> 31,415,332	<i>Peculs.</i> 56,133	<i>Hk. Ta</i> 23,178,797	<i>Peculs.</i> 20,390	<i>Hk. Ta</i> 8,236,535
1866,.....	81,350	38,224,632	64,516	31,273,465	16,834	6,951,167
1867,.....	86,530	39,513,533	60,948	28,720,445	25,582	10,793,088
1868,.....	69,537	29,764,604	53,915	23,454,101	15,622	6,310,502
1869,.....	86,065	38,085,991	53,413	23,635,505	32,652	14,450,486
1870,.....	95,045	40,183,957	58,817	24,877,547	36,228	15,306,410
1871,.....	89,744	40,544,866	59,670	25,952,356	39,074	14,592,510
1872,.....	86,385	34,580,076	61,193	25,204,305	25,192	9,375,771

A deduction must be made from this, for the amount sent to California for the use of the Chinese there. This has been for the last six years as follows :—

1867,.....	<i>Boxes</i> 873, \$ 370,402, say <i>Hk. Ta</i> 246,935
1868,.....	" 449, " 188,750, " " 125,833
1869,.....	" 343, " 138,453, " " 92,302
1870,.....	" 272, " 102,970, " " 68,647
1871,.....	" 1,409, " 596,190, " " 397,460
1872,.....	" 796, " 344,833, " " 229,889

NOTE.—These Tables of Articles, 1 @ 9, may be regarded as being each correct in itself, but it must be remembered that any re-casting of them can only give approximately correct results : with this warning it may be said :—

- 1°. The Figures of the First Table *minus* those of the Second, give the Net value of the Foreign Import Trade of China.
 - 2°. The Figures of the Ninth Table *plus* those of the Eighth give the Net value of the Foreign Export Trade of China.
 - 3°. The Figures of the Sixth Table *minus* those of the Seventh and Eighth, give the Net value of the Chinese Coasting Trade inwards as carried on between Treaty Ports in Foreign Bottoms.
 - 4°. The Figures of the Fifth Table *minus* those of the Eighth, give the Net value of original shipments of Chinese commodities, in Foreign Bottoms, for Home consumption.
 - 5°. The Figures of Table 6° ought to correspond generally with the sum of the Figures of Tables 5° and 7° : for what is received by all ports is simply what is sent from all ports. But, wrecks and casualties apart, cargoes despatched during the last weeks of a year do not arrive at the port of discharge till after the commencement of the succeeding year, and the Statistics of ports departed from, for any given year, must accordingly differ from those of ports arrived at ; and, besides, port peculiarities allowed for, an explanation of many seeming discrepancies is to be found in the anomalous position and disturbing influence of Hongkong.
 - 6°. In the items of merchandise named in these general Tables, much detail has been impossible. Staples alone are specified, and other descriptions of goods are classed among the Sundries. For greater detail and for more information about articles here treated as Sundries, the separate Statistics of each Treaty Port can be referred to.
-

IV.—REVENUE.

The Tables which follow, $\frac{1 @ 4}{\text{Revenue}}$, are intended :—

- 1°. To show the grand total of the Revenue accruing to China annually on Foreign Trade, as collected, through the offices of the Inspectorate of Customs, at Treaty Ports on goods in Foreign Bottoms.
- 2°. To show to what extent the various Sources of Revenue have contributed to the grand total.
- 3°. To show to what extent the trade carried on under each Foreign Flag contributes to the Customs' Revenue of China.
- 4°. To show the separate amounts collected annually at the several Treaty Ports* actually open to trade.

* *Nanking, on the Yangtze, and Kiung-chow, in Hainan, are Treaty Ports, but they have never been declared open to trade.*

Nanking and Kiungchow are Treaty Ports which have not yet been declared open to trade, and at which no Foreign merchants are established.
The figures opposite the names of the ports are the years of the opening of Custom Houses there under the Inspectorate of Customs.

NOTE.—The Tables which precede, ¹ @ 4 Revenue, do not include the Revenue which China derives from native trade and other Chinese sources, but merely that which accrues on the trade carried on in Foreign Bottoms (a few specially licensed junks included) and at the Treaty Ports.

V.—POPULATION.

The Tables which follow, $\frac{1 @ 2}{\text{Population}}$, are intended :—

- 1°. To bring together some information respecting the Provinces in direct contact with Foreign Countries through the Treaty Ports,—that is to say, to give the size, population and chief physical features of each *Treaty Port Province*, and [hamlets, villages and small towns not included] the number of walled cities in each.
 - 2°. To bring together some information respecting the Treaty Ports themselves,—that is to say, to show the Chinese population of each Treaty Port and of the *Prefecture* in which it is situated, and to exhibit the Foreign population of each port, showing the number of mercantile houses and of individuals of each nationality at each Port.
-

1
Statistics of Population in the Treaty Port Provinces.
Population.

	Square Mileage.	Number of Prefectural Cities. (Fu and Independent Chow Cities.)	Number of District Cities. (Hsien and Subordinate Chow Cities.)	Population estimated at	PHYSICAL FEATURES:— 1. Mountainous or Flat. 2. Internal Communication—Land or Water. 3. Riverine or Seaboard.
SHINGKING,	43,000	2	13	6,000,000	1. Valley of Liao flat; rest of Province mountainous. 2. Liao river navigated; Land communication mostly used. 3. Seaboard.
PECHILI,	58,949	7	140	27,000,000	1. Flat. 2. Land and water. 3. Seaboard.
SHANTUNG,	65,104	10	96	28,958,764	1. North-west, south and west flat; centre and east mountainous. 2. With the exception of the south, which has excellent water communication, the province has communication with the interior by land. 3. Seaboard.
HUPEI,	70,450	11	68	27,370,098	1. Flat. 2. Water. 3. Riverine.
KIANGSI,	72,176	14	79	19,000,000	1. Very Mountainous. 2. Water. 3. Riverine.
KIANGSU,	45,000	11	46	37,843,501	1. Flat. 2. Chiefly water. 3. Both riverine and seaboard.
CHEKIANG,	39,000	11	65	21,000,000	1. Mountainous. 2. Water. 3. Seaboard.
FUKIEN,	53,480	12	62	14,777,410	1. Mountainous. 2. Mostly by water. 3. Seaboard.
KUANGTUNG,	79,456	15	89	19,174,030	1. Mountainous. 2. Mostly by water. 3. Seaboard.

* Formosa consists of a single Prefecture. The population is thus given by Chinese authorities, but it cannot be accepted as reliable, owing to the want of Statistics concerning the semi-independent aborigines.

NOTE.—The Tables which precede $\frac{1 @ 2}{\text{Population}}$, may be regarded as approximately correct in respect of the size of the Provinces and Chinese population. The return of the Foreigners resident at the Treaty Ports is correct and reliable; the column headed *Individuals* includes Foreigners of all classes,—men, women and children, merchants, officials, and missionaries and the families of resident sea-faring Foreigners,—but excludes the crews of vessels not engaged exclusively in the Home Trade of China.

ALFRED E. HIPPISEY,

Clerk-in-Charge,

Returns Department,

Shanghai.

REVENUE.

I
TRADE IN FOREIGN BOTTOMS: Total Revenue accruing from Foreign Trade.
Revenue.

	1863.	1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.	1872.
	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>	<i>Hk. Ta m.c.c.</i>
Total Collection,	37,596.1.5.2	30,071.3.9.6	20,279.3.8.9	15,657.5.3.8	23,967.3.6.3	36,478.6.9.8	54,655.2.5.0	71,362.0.2.7	142,365.8.1.7	337,083.2.7.0
Expense of Collection,	83%	103%	153%	199%	130%	85%	53%	44%	22%	9%

N.B.—All the principal Imports, such as Opium, Foreign Piece Goods, &c., pay duty at Shanghai and come to Chinkiang under Exemption Certificate, hence the apparently excessive expense in the collection of duties.

2
TRADE IN FOREIGN BOTTOMS: Total Collection of Revenue on Foreign Trade as divided between its various sources.
Revenue.

REVENUE.

¹ TRADE IN FOREIGN BOTTOMS: Total Revenue accruing from Foreign Trade.
Revenue.

—	1863.	1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.	1872.
	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>	<i>Hk. Tā m.c.c.</i>
Total Collection,	37,596.1.5.2	30,071.3.9.6	20,279.3.8.9	15,657.5.3.8	23,967.3.6.3	36,478.6.9.8	54,655.2.5.0	71,362.0.2.7	142,365.8.1.7	337,083.2.7.0
Expense of Collection,	83%	103%	153%	199%	130%	85%	53%	44%	22%	9%

N.B.—All the principal Imports, such as Opium, Foreign Piece Goods, &c., pay duty at Shanghai and come to Chinkiang under Exemption Certificate, hence the apparently excessive expense in the collection of duties.

² TRADE IN FOREIGN BOTTOMS: Total Collection of Revenue on Foreign Trade as divided between its various sources.
Revenue.

POPULATION.

1
Population. STATISTICS concerning Population of the Province.

	Square Mileage.	Number of Prefectural Cities. (Fu and Independent Chow Cities.)	Number of District Cities. (Hsien and Subordinate Chow Cities.)	Population estimated at	PHYSICAL FEATURES:— 1. Mountainous or Flat. 2. Internal Communication—Land or Water. 3. Riverine or Seaboard.
FUKIEN,	53,480*	12	62	14,777,410*	1. The surface of the earth of the Fuhkien Province, and of this portion of it especially, is very uneven, huge fantastic boulders cropping up at frequent intervals, and bluffs, hills, and brown arid mountains abounding. 2. The means of internal communication are land and water. The great highway from Peking to Canton, along which there is endless traffic, passes through this province and this (the Amoy) district, via Hui-an-hsien 惠安縣, Chuan-chou-fu 泉州府, Tung-an-hsien 同安縣 and Chang-chou-fu 漳州府, whence it enters the Kwangtung Province. 3. Seaboard.

* The area of the province in English statute miles, and its population, are according to the Imperial Census of 1812. No addition is made to the then estimate, in the belief that the accepted estimate for the population of China generally is enormously exaggerated. An analysis by Baron von Richthofen of the population of Chekiang, founded on his own observations, gives the estimate as 8,000,000, whereas the census of 1812, usually adopted as authoritative, puts it at 26,000,000.

The 12 Prefectural cities comprise 10 *Fu*, including that of Taiwan in Formosa, and 2 *Chow* cities, namely Yung-chun-chou and Lung-yen-chou. The 62 District cities include 4 in Formosa.

2
